

ASSIGNMENT 5.1

Problem Statement 1:

Write a function to compute $5/0$ and use try/except to catch the exceptions.

CODE AND OUTPUT:

```
In [71]: def exp():  
        try:  
            k=5/0  
        except ZeroDivisionError:  
            print("Number cannot be divisible by 0")  
  
exp()
```

Number cannot be divisible by 0
